The Greatest whitewater on Earth

MOONDACA

Most run right down the throat on Moondaca. Its clean!

HIMALAYA

The Futaleufú Class 3/5, is known as the "The Greatest Whitewater on Earth" and the Crown Jewel of South American rivers. You have never experienced anything like it. A combination of challenging river running, high energy surfing, warm turquoise water and incredible vistas.

On the big stuff you have options! The sneak shoot, or down the middle. There are the "BIG FIVE" rapids. These are five class five rapids that are beautiful to see. In order of their difficulty: Casa de Piedra, Terminator, Infierno, Zeta and the Throne Room. All runnable and with well worn portage trails. There are great play sections on the Futa. You can have the best paddling of your life and never paddle a Class 5 rapid.

How experienced does one have to be for our class 4 to 5 trips? You need to have a solid roll and paddled whitewater similar to the upper Gauley, the California Salmon, or the Grand Canyon. When you arrive at our Club Futa at Campo Tres Monjas, we start off paddling the easiest sections and the tributaries first. We solidify your confidence as we move on to the more challenging sections. You are in control of your decisions. You can walk or avoid any rapid you choose to. We are here to support you and back you up. This may allow you to reach for more challenges than you ever thought possible. Remember our "Dream Team" guides are here for YOU, not their egos.

Talk to our Alumni. Some have been kayaking all over the world and have told us THIS was the funnest kayaking trip of their lives.
